

Assemble a Specific Solution or Extend the Value of Your eSignature Investment

IMM eSign Add-On Modules

eSign is IMM’s enterprise document presentation and eSignature platform. As a contemporary technology application, IMM eSign can be customized with a number of standard parameters and options, helping your institution adapt eSignatures to your specific business needs. For more sophisticated or individualized requirements, IMM has also developed a family of add-on modules that extend the value and benefits you can realize from your investment. Contact your IMM Client Success Manager for pricing and further information about these available modules.

Remote eSignatures

This add-on module enables you to easily and securely distribute documents for remote electronic signature through an intuitive, secure cloud-based service. A seamless experience within IMM eSign, this is one of the most popular add-on modules in use today.

LaserChex for IMM eSign

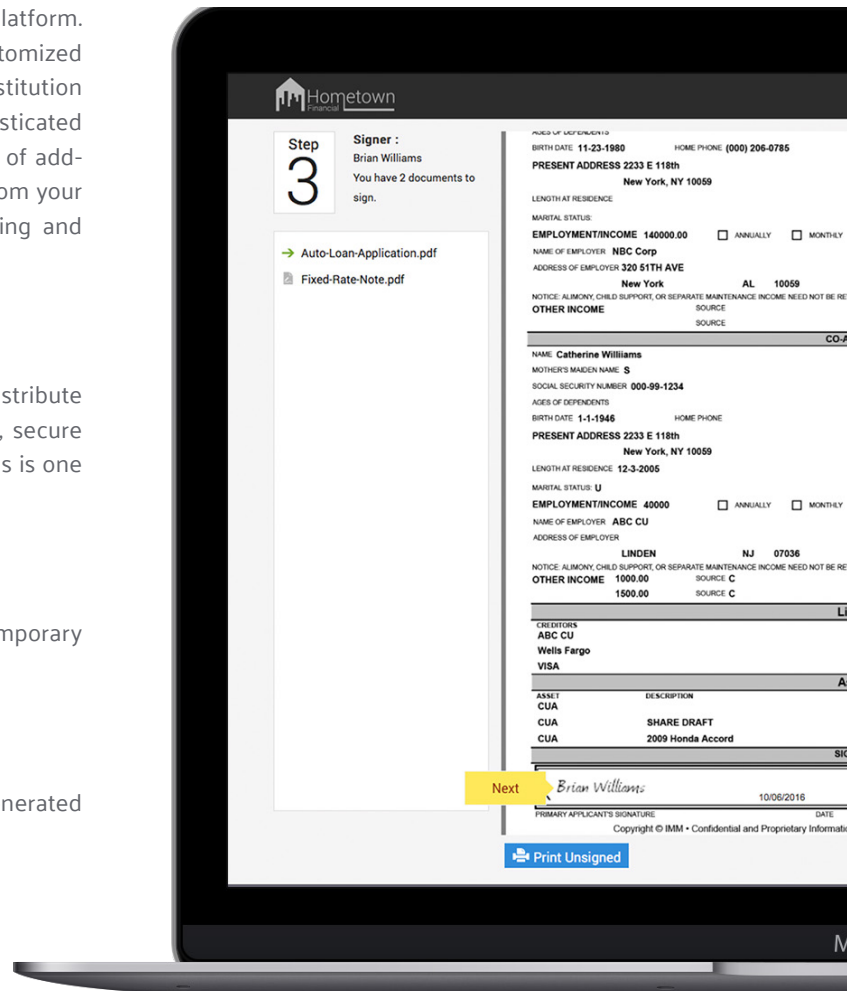

Enables the generation and printing of “on-demand” starter or temporary checks for consumer service appeal.

Loan Coupons for IMM eSign

Generate and print initial quantities of Loan Coupons for newly generated or closed loans.

TTCU’s branches are being remodeled with an open concept design and will be fully equipped with touch screen monitors and iPads. IMM’s eSignature technology fit perfectly into this vision to provide the credit union members with a fluid, dynamic experience.

About IMM

For over 21 years, IMM has been a leading innovator of eSignature solutions designed exclusively for Financial Institutions. Today, more than 775 Banks and Credit Unions use IMM’s eSign solutions across the Institution to enhance consumer experiences while also streamlining back-office processes.
